PROFESSIONAL SUMMARY

Software Developer with 3+ years of experience designing and developing enterprise applications using Java, Spring Boot, Vue.js, REST APIs, SQL, and MySQL. Experienced in building scalable backend systems, secure authentication using OAuth 2.0 and ForgeRock, production support, and Agile software development. Hands-on experience developing AI-powered applications using LLMs, RAG, and vector databases.

TECHNICAL SKILLS

Languages: Java, PHP, JavaScript, SQL, HTML5, CSS3

Backend: Spring Framework, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Laravel, Node.js

Frontend: Vue.js, Bootstrap

Databases: MySQL, SQL Server, MongoDB, Firebase

AI/ML: LLMs, RAG, FAISS, Ollama, Hugging Face, Prompt Engineering

APIs & Security: REST APIs, OAuth 2.0, JWT, ForgeRock, JSON

Tools: Git, GitHub, Azure DevOps, Maven, Postman, Power BI, Streamlit

WORK EXPERIENCE

Software Developer

Aug 2025 - Jun 2026

Antec Controls, Price Industries

Winnipeg, Manitoba, Canada

Technologies Used: Vue.js • Java • MySQL • C# • Power BI • Azure • ForgeRock • OAuth • Git • Azure DevOps

- Developed and enhanced enterprise applications including the Quick Pricing Tool and Antec Select Web Tool, reducing production defects by approximately 20% through bug fixes and feature enhancements.
- Integrated Azure Application Insights with Power BI dashboards, reducing application monitoring effort by approximately 30% through automated reporting and centralized telemetry.
- Implemented ForgeRock Identity Management, OAuth-based authentication, and automation scripts for secure user provisioning and access management.
- Diagnosed production issues through debugging, log analysis, telemetry, and database investigations, reducing issue resolution time by approximately 25%.
- Developed enhancements for the Antec Excel Toolkit (Vue.js, C#) and contributed to website modernization using WordPress while maintaining technical documentation.

Systems Engineer

Jan 2022 – Apr 2024

Infosys Limited

Trivandrum, Kerala, India

Technologies Used: Java • Spring Boot • Spring Framework • Hibernate • JPA • REST APIs • SQL Server • MongoDB • Snowflake • Hive • DynamoDB • Git

- Developed enterprise applications using desktop, monolithic, and microservices architectures with Java, Spring Boot, Spring Framework, REST APIs, and multiple relational and NoSQL databases.
- Developed enterprise modules for the Infosys Enterprise Data Privacy Suite (IEDPS) using Java, Spring Boot, Spring Framework, and REST APIs.
- Designed, developed, and maintained desktop, monolithic, and microservices-based enterprise applications across five core IEDPS modules.
- Built features across Data Masking, Data Discovery, Inventory Management, Data Generation, and User Management while integrating MySQL, SQL Server, MongoDB, Snowflake, Hive, and DynamoDB.
- Implemented enterprise data masking solutions for the Transamerica client and integrated third-party services to improve system interoperability.
- Provided production support through debugging, root cause analysis, code reviews, Agile development, and technical documentation.

EDUCATION

Post-Degree Program in Web Application Development | May 2024 – May 2025 | University of Winnipeg - PACE (Professional, Applied & Continuing Education) | CGPA: 4/4.5

Bachelor of Technology (B.Tech Hons.) Civil Engineering | Aug 2017 – Aug 2021 | College of Engineering, Kidangoor, Kottayam, Kerala (APJ Abdul Kalam Technological University) | CGPA: 8.33 / 10

CERTIFICATIONS

- | | |
|--|--|
| • Infosys Certified Java Developer | • Infosys Certified Microservice Developer |
| • Infosys Certified Frontend Web Developer | • Infosys Certified Spring REST Professional |
| • Infosys Certified Global Agile Developer | • Generative AI Fundamentals - Databricks |

PERSONAL PROJECTS

Full-Stack eCommerce Application | Java, Spring Boot, Vue.js, MySQL

- Built a full-stack bakery eCommerce platform using Java, Spring Boot, Vue.js, and MySQL with REST APIs and responsive UI.
- Implemented Spring Security, OAuth 2.0, JWT, BCrypt, and RBAC for secure customer and admin authentication.
- Developed product catalog, search, shopping cart, order management, user profiles, admin panel, and custom cake builder with dynamic pricing.
- Built the frontend using Vue 3, Pinia, Vue Router, Bootstrap, and reusable components.
- Integrated Google Gemini AI to analyze sales data and generate business insights and recommendations.
- Developed automated daily sales PDF reports and integrated n8n + Gmail SMTP to schedule and email reports with PDF attachments.

AI-Powered Knowledge Assistant | Python, Streamlit, Ollama, FAISS

- Developed an AI-powered knowledge assistant using Python, Streamlit, Ollama, FAISS, and Hugging Face embeddings for semantic document search and conversational question answering.
- Implemented Retrieval-Augmented Generation (RAG) with document ingestion, text chunking, vector indexing, similarity search, and prompt engineering.
- Built an interactive AI application capable of retrieving context-aware responses from uploaded documents using local LLM inference.

WPG Wallet - Personal Finance Application | Java, Node.js, Firebase, MySQL

- Designed and developed a full-stack personal finance application featuring secure authentication, account management, fund transfers, and financial analytics.
- Implemented a modular architecture with transaction management, financial reporting, and real-time user notification workflows.
- Developed REST APIs, integrated Firebase authentication, and built a responsive UI with secure session management and clean user experience.
